## EDUCATION

University of North Carolina at Charlotte,

*Bachelor of Science, Computer Science: concentration in AI, Gaming, and Robotics;*

GPA: 3.56/4.0; Dean's List Fall 2025

August 2023 - May 2026

Charlotte, NC

- **Relevant Coursework:** Data Structures & Algorithms, Software Engineering, Database Design & Implementation, Artificial Intelligence, Machine Learning, Web Application Development, Operating Systems & Networking

## PROFESSIONAL EXPERIENCE

Wells Fargo

Jul 2022-Apr 2024

*Engineering Associate - Full-time*

Charlotte, NC

- Managed and updated 100+ ServiceNow tickets monthly to support asset lifecycle management, infrastructure changes, and IT governance processes
- Coordinated IT asset lifecycle management across cross-functional teams, supporting secure deployment, inventory tracking, hardware decommissioning, and enterprise infrastructure operations.
- Supported vulnerability remediation, system documentation, and governance tracking while documenting infrastructure changes and performance metrics using Confluence and Microsoft Excel

*Software Engineer- Internship*

Jan 2022-Jul 2022

- Supported the Load Balancer Engineering team by managing ServiceNow ITSM change tickets for network and configuration updates, ensuring accurate implementation and documentation.
- Performed network connectivity validation using command-line tools, including ping, nslookup, tracer/traceRoute, IP address verification, DNS, and CNAME record validation to support enterprise infrastructure changes.
- Collaborated with Load Balancer Engineering teams to support application availability, traffic distribution, and enterprise network reliability

Amazon,

July 2021 - Dec 2021

*FC Associate I*

Charlotte, NC

- Processed 200+ online grocery orders daily with 99% accuracy, ensuring timely and accurate customer fulfillment in a fast-paced retail environment.
- Maintained 95% customer satisfaction by carefully selecting high-quality products, minimizing fulfillment errors, and meeting delivery deadlines.
- Collaborated with Whole Foods and Amazon team members to achieve daily operational goals while maintaining quality, efficiency, and food safety standards.

## TECH PROJECTS

IT Help Desk Ticket System | *React, Node.js, Express.js, MongoDB, JWT* | *Per-Scholas*

Summer 2025

- Developed a full-stack MERN help desk application with JWT authentication, role-based access control, and responsive interfaces for employees and technicians.
- Built RESTful APIs supporting ticket creation, assignment, status and priority updates, comments, and full CRUD operations.
- Deployed the frontend on Vercel and backend on Render, integrating MongoDB Atlas for cloud-hosted data storage.

Machine Learning Risk Classification – AI Job Market | *Python, Pandas, NumPy, Scikit-learn* | *UNC Charlotte*

Fall 2025

- Built Logistic Regression and Random Forest classification models using a dataset of more than 30,000 job-market records.
- Developed an end-to-end machine learning pipeline covering data preprocessing, model training, evaluation, and workflow automation.
- Evaluated model performance using F1-score, confusion matrices, and classification metrics.

AI Study Assistant | *React, Python, Flask, Hugging Face API, Vercel, Render* | *Personal*

Summer 2026

- Built and deployed a full-stack AI study assistant that generates summaries, quizzes, and flashcards from uploaded study notes.
- Developed a React frontend and Flask REST API integrated with Hugging Face AI models using Fetch API and JSON.
- Deployed the application on Vercel and Render using secure environment variables and end-to-end application testing.

## TECHNICAL SKILLS

- **Languages & Development:** Python, JavaScript, TypeScript, SQL, React, Next.js, Node.js, Express.js, Flask
- **AI & Machine Learning:** Scikit-learn, Pandas, LLMs, RAG, Embeddings, FAISS
- **Databases & Cloud:** MySQL, MongoDB, Microsoft Azure, Linux
- **Tools & Networking:** Git, GitHub, ServiceNow, Postman, TCP/IP, DNS, Load Balancing
- **Certification:** CompTIA Security+ | Microsoft Azure Fundamentals (AZ-900) | Google IT Support Professional Certificate | IBM Artificial Intelligence Fundamentals (SkillsBuild)

## LEADERSHIP & EXTRACURRICULARS

*Professional Development & Affiliations | Charlotte, NC*

- Completed an intensive 15-week Software Engineering program at Per Scholas focused on Python, JavaScript, MERN stack development, REST APIs, and Agile methodologies
- Participated in UNC Charlotte Career & Professional Development conferences to network with recruiters, technology professionals, and industry leaders
- Participated in generative AI and financial technology campus events focused on AI implementation within enterprise and banking environments
- Professional Affiliations: Year Up Alum, Per Scholas Alum, CodePath Alum, Mentor Me Collective Alum, Women+ in Technology of Charlotte, ColorStack Member
