

HAIDA MAKOUANGOU

Morrisville, NC 27560 | (980) 829-6691 | hmakouan06@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

EDUCATION

University of North Carolina at Charlotte

Bachelor of Science, Computer Science - AI, Gaming and Robotics

Aug 2023 - May 2026

Charlotte, NC

• **Achievements:** Cum Laude, Dean's List, Fall 2025

• **Coursework:** Machine Learning, Artificial Intelligence, Data Structures & Algorithms, Software Engineering, Database Design & Implementation, Mobile Robotics, Web Application Development, Operating Systems & Networking, Computer Systems, Probability & Statistics, Linear Algebra

PROFESSIONAL EXPERIENCE

Wells Fargo | *Engineering Associate*

Jul 2022 - Apr 2024

- Managed and updated 100+ ServiceNow tickets monthly to support infrastructure changes, asset lifecycle activities, and software development life cycle automation within IT governance processes.
- Collaborated with Data Center Hosting Services to coordinate hardware decommissioning, validate asset inventory records, and document reliable implementation of enterprise governance and asset-lifecycle controls.
- Supported software testing and vulnerability remediation efforts by documenting infrastructure changes, test results, and performance metrics in Confluence and Microsoft Excel.

Software Engineer Intern- Team Load Balancer

Jan 2022 - Jul 2022

- Supported the Load Balancer Engineering team by managing ServiceNow ITSM change tickets for network and configuration updates, validating implementation details, and maintaining accurate documentation.
- Performed network connectivity troubleshooting and validation using command-line tools, including ping, nslookup, tracer/tracepath, IP address verification, DNS and CNAME record validation to support enterprise infrastructure changes.
- Collaborated with Load Balancer Engineering teams to support application availability, traffic distribution, and reliable enterprise network operations.

VIRTUAL JOB SIMULATIONS

Wells Fargo's Software Engineering Job Simulation on Forage | *July 16, 2026*

- Understood relevant requirements for building a system to manage financial portfolios
- Figured out what data the system needed to keep track of
- Drafted a visual representation of the data as an entity relationship diagram (ERD)
- Used the IntelliJ developer application to implement the ERD and published it to GitHub

IGE Aerospace's Explore Digital Technology Job Simulation on Forage | *October 12, 2024*

- Completed a Vue.js UI development simulation for the Frontend Development Team, demonstrating proficiency in Vue SFC Playground.
- Applied Vue.js skills by adding features like headings, images, and dynamic variable displays. Implemented a compute button for efficient user interactions.
- Drafted clear technical requirements for a feature, suggesting optimal order times for plane parts.
- Explored strategies to align technical specifications with business requirements, ensuring effective solutions.

Verizon Cloud Platform Job Simulation on Forage | *November 2, 2025*

- Completed a job simulation involving building a hypothetical new VPN product for Verizon's Cloud Computing team.
- Used command-line Python to test whether Verizon's VPN met the cloud-native traits, i.e., redundancy, resiliency, and least privilege.
- Researched approaches to achieve application security and communicated insights in a PowerPoint presentation.

PROJECTS

Machine Learning Risk Classification - AI Job Market | *UNC Charlotte Fall 2025*

- Built Logistic Regression and Random Forest classification models using a dataset of more than 30,000 job-market records.
- Developed an end-to-end machine learning pipeline covering data preprocessing, model training, evaluation, and workflow automation.
- Evaluated model performance using F1-score, confusion matrices, and classification metrics.

AI Study Assistant | *Personal Project | Spring 2026*

- Built and deployed a full-stack AI study assistant that generates summaries, quizzes, and flashcards from uploaded study notes.
- Developed a React frontend and Flask REST API integrated with Hugging Face AI models using Fetch API and JSON.
- Deployed the application on Vercel and Render using secure environment variables and end-to-end application testing.

IT Help Desk Ticket System | *Per-Scholas | Summer 2025*

- Developed a full-stack MERN help desk application with JWT authentication, role-based access control, and responsive interfaces for employees and technicians.
- Built RESTful APIs supporting ticket creation, assignment, status and priority updates, comments, and full CRUD operations.
- Deployed the frontend on Vercel and backend on Render, integrating MongoDB Atlas for cloud-hosted data storage.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- CompTIA Security+, Microsoft Azure Fundamentals (AZ-900); Google IT Support; IBM AI Fundamentals
- Per Scholas Software Engineering; Year Up Application Development; CodePath Technical Interview & AI Training
- Honors: Cum Laude; Dean's List, UNC Charlotte, Fall 2025
- Member of ColorStack, Year Up, Per Scholas, CodePath, and Mentor Me Collective professional networks.
